some Tearing Shells Tested at Indian Head Proving-grounds. Associated Press Leased-wire Service. WASHINGTON, April 10.-There wer

several interesting tests at the naval prov ing-grounds at Indian Head today. First came an acceptance test of a semi-armor-piercing thirteen-inch shell, carrying a large explosive charge, and represe lot of fifty such shells. This was required to pierce a seven-inch nickel-steel plate and carry its charge through in condition to explode on the other side. The shell tested today was of the sterling type and completely met the conditions imposed. It was made of forged steel, and penetrated the plate without sensible deformation or fracture of the shell. Next came a test of fixed ammunicon for a six-insh rapid-fire gun, the largest gur of this type in the nayy. The shells were made by the Win-chester Arms Works, and functioned per-

chester Arms Works, and functioned perfectly.

A few days ago some tests were made of the service percussion fuse for shells of the five-inch suns, when fired at two-inch steel-armor plates. The fuse then carried through the plates before exploding. There were further experiments today to settle an important point that had been left unsettled, namely, the distance that the shells are carried beyond the plate before exploding. A plate was supported on piles over the water. Behind this stakes were placed at intervals of six feet, and an observer was stationed at one side to note where the explosion occurred. It was seen that the shells, after perforating the plates, burst at disfances ranging from ten to thirteen feet in the rear. This was exactly what was wanted, as it insures the explosion of the shell in the interior of a ship if it sets through its side.

THE COUNTERFEIT STAMPS. cks are Rapidly Accumulating the Authorities' Hands.

CHICAGO, April 10.-Counterfeit two cent postage stamps are rapidly accumulating in the hands of Capt. Porter of the United States secret service. Two more packages containing 5570 each were captured yesterday, and arrests are expected to follow in a short time. It is now believed the persons implicated in the crime may be found in Chicago, and in all of the principal Cities of the Inited States. All incipal cities of the United States. All the packages seized were received from Buf-falo, N. Y., by the Wells-Fargo Express Company. Each of these packages were

consigned by the Canadian Novelty Com-pany of Hamilton, Ont., and were sent c.o.d. pany of Hamilton, Ont., and were sent e.o.d.

Postmaster Heeing has ten samples of the spurious stamps on his desk. "They are extraordinary counterfeits," he said. "One million counterfeit stamps such as these could pass through this office every day and not be detected. Where we handle 1.300.000 letters daily, cancelling them on machines which have a capacity of 40.000 per hour, you see how it is next to impossible to examine the stamps. This makes it all the more dangerous in the line of counterfeiting. When one puts this counterfeit by the side of a good stamp the difference can readily be detected. The bad stamp is larger, and the printing is not so good, yet good "nough and near enough in size to deceive any unsuspecting man in the world. What the effect of this discovery will be, I cannot tell. The present 3-cent issue undoubtedly will be recalled, but I have no authority for that statement further than my judgment of what the government must do to protect itself. It may not be necessary to make a new design. Another color might be used."

Capt. Stuart said he regarded the purchasers of these stamps as innocent, and would make no arrests in that direction.

OF ENGLISH MAKE.

OF ENGLISH MAKE. WASHINOTON, April 10.—A quantity of the counterfeit stamps were sent from the Postoffice Department to the Bureau of Engraving and Printing, to be examined by the chief of the bureau. After careful study, the chief said that from certain poculiarities he believed the paper on which the counterfeits were printed was manufactured in England, and was gumined before it was printed. It could have been made in this country, however, without violation of law, as the manufacture of paper for postage stamps is not prohibbed, as is that intended for green-backs. Recertly the bureau has decided to adopt paper having a certain distinguishing water mark, and the manufacture of paper with this mark will fall within the counterfeit laws.

THE POLICY OF CAMPOS. THE POLICY OF CAMPOS.

WASHINGTON, April 10.—The policy of Gen. Martinez Campos, the Spanish commander-in-chief, en route to Cubafor a decisive stroke against the revolution, is made known in the copies of the proceedings of the Spanish the proceedings of the Spanish congress just received here. The night before Campos sailed here, both he and the Minister of Foreign Affaire addressed the Cortes. The significance of Gen. Campon' speech lay in its conciliatory character, showing his purpose was to avoid bloodshed. It was also brought out that while he would keep free from party en-tanglements in Cuba, he is strongly in-clined toward the autonomists or conserva-tive element, and depended on them to re-

sist separation from Spain.
"I am in hope," sa.d Gen. Campos, "that
when I arrive in Cuba the war will be
over, for I have no wish for that kind of glory." He expressed the hope that the various political parties of Cuba would be inspired to assist him in putting down the uprising. "I will do everything," said he, "toward seeing that no party what-ever shall exercise its influence against the autonomistic element." It would be intolerable that the Monroe doctrine should be so wrenched as to cover such international outrages as that of which Nicaragua has been guilty. Fortunately for the continuance of friendly relations between the two great nations, there is far less disposition than formerly in America to take advantage of every opportunity to huri defiance at England. the rate on petroleum and its products. Vice-President Stubbs, of the Southern Pacific; R. X. Ryan, general passenger and freight agent of the San Francisco and North Pacific; and General Freight Agent Bush, of the Atlantic and Pacific, made the complaint that the present rate on coal oil is too low to leave any profit for their companies. They wanted an increase in rate, and to support their appeal they made a very plausible showing.

Formerly coal oil in less than carload lots was classed as "double first-class rate," but the Western classification freight rates reduced it to third-class, which raffiroad men contend is too swesping and inequitable. On the other hand, protests from dealers in palits and offs not present at the meeting, stated that the prevailing rate here is higher in comparison with that of other States.

Stubbs argued that his risk attendant upon transportation of coal oil should be considered, and he submitted figures to show that the proposed advance would be only a trifling matter to consumers not 50 cents a year to a consumer in Fresno. What is wanted is a first-class rate on less that carload lots, which would be from 15 to 20 per cent, less than the other rate.

Ryan said that petroleum should be carried only in tanks, but it is necessary to carry it in small lots here as an accommodation to people in the thinly-populated districts. The master was laid over till the next meeting, when dealers wall be asked for an opinion as to the advisability of changing the rate.

As to rents from mixed property, such as a turnished hotel, the Commissioner will no doubt hold that the owner himself must separate the taxable from the non-taxable, and state the proportion of the rents derived from such. In making returns taxpayers, well be obliged to state in detail what the exemptions are, including the amount of rents received and on what particular property.

ANOTHER TEST CASE. NEW YORK, April 10.—Another suit to contest the constitutionality of the income tax has been instituted in the Circuit Court here. It is an action in equity, brought by Charles Allen of Greenfield, Mass., against the Illinois Central Railway Company et al. In his bill of complaint the complainant, after setting forth the organization of the railroad company, the amount of personal property held by it, and other matters in relation thereto, declares that he is informed that the company intends to pay, under the provisions of the income-tax law, a tax of 2 per cent, on all its net profits and income for the year 1894.

The subject is handled in the form of a report as to the status of negotiations for paying the claims of the masters of Canadian sealers seized in Bering Sea. It shows that Senator Morgan erred in stating fictitious values have been put on some vessels and the cargoes seized. It also appears, it is stated, that Senator Morgan's statement that interest was added is erroneous and that no interest was included. MEMPHIS (Tenn.,) April 10.—The Ame night. A good deal of important business was disposed of, but the horsement struck a snag in the report of the compilities are produced to formulate recommendation.

struck a snag in the report of the committee appointed to formulate racing rules for 1895. The report was discussed until after 1 o'clock without action. Its consideration will be resumed tonight.

The following well-known racing-men represent the fourteen tracks making up the membership of the congress: E. F. Clay, Lexington, Ky.; W. F. Schutz, Louisville; L. P. Tarleton, Latonia; William Harding, St. Louis Jockey Club; E. Corrigan, Chicago Racing Association and Overland Park Club, Denver; M. Overton, Cumberland Fair Association, Nashville; George Arnold, New Memphis Jockey Club; J. M. Gracie, Little Rock Jockey Club; Joseph A. Murphy, Chicago Fair Ground Association; J. M. Huger, New Louisiana Jockey Club; Alexander S. Labold, Cincinnati Jockey Club; Col. Lewis Clarke of Louisville. In the absence of President Maffit, the meeting was presided over by Vice-President S. B. Montgomery of Memphis.

declares that he is informed that the company intends to pay, under the provisions of the income-tax law, a tax of 2 per cent, on all its net profits and income for the year 1894.

The bill then avers that the income-tax law is unconstitutional in that if it is said the tax is collectable on the company's income and profits, it is a direct tax in respect to the railway property, fixtures and appurtenances operated and owned by the defendant company by being imposed upon the income and profits thereof, the same being real estate, and likewise a direct tax in respect to its personal property by being imposed upon the income and profits thereof, the same being real estate, and likewise a direct tax in respect to its personal property by being imposed upon the income tax and profits thereof, the same being real estate, and likewise a direct tax in respect to its personal property by being imposed upon the income tax and profits. considering their case in the pariors upstairs. Among the well-known jockeys affected by this decision of the Turf Congress are John Martin, Patsy McDermott, Ed McGavin and Charles Kuhn.

The fight between Lewis Long and George Bennett over the right to the services of Jockey Felix Carr, was decided by the congress to be beyond its jurisdiction and a matter for the courts to decide. This report of the Rules Committee which will be taken up this afternoon was practically unanimous on all points. The principal point of disagreement was the clause providing that "the express condition of a race shall supercede all rules," and the regulation of selling races. Owing to the fact that the sessions of the congress are secret, nothing will be known as to the nature of the changes made in the racing rules for this year until the consideration of the subject is concluded by the congress.

They left Circle City. and a companion named Hooper, two traders who have stores on the tributaries of the headwaters of the Yukon River. They left Circle City, which is situated just within the Arctic Circle, February 22, accompanied by two Indians, who were taken along to carry their luggage. The thermometer was 74 deg. below zero, and to form an adequate idea of the fall of snow in that part of the world, it is but necessary to state that near Circle City is a canyon about four hundred feet deep and haff a mile in width, which was filled nearly to the mouth of the mountain crests, causing the country to present the appearance of an undulating plain.

The non-arrival of the steamer Arctic from St. Michael's Island, at the outlet of the Yukon, caused the supply of provisions to become exhausted before the wintar was half over. The captain of the vessel became angered at some trivial occurrence and deliberately abandoned the steamer at Fort Yukon, 1500 miles from the mines. The summer season was fast coming to a close and before another man could be obtained to take his place the river frose and left the vessel fast in the fee, which jeopardized the lives of over one thousand miners.

Early in the winter all hands were put on limited rations, and when the new year davged there were only nine sacks of flourin all the camps. Several days previous the supply of bacon and beans had been exhausted. However, there was ample coffee and sait on hand and an abundance of wild game insured the miners against actual starvation, though they fully realized that such a diet for six months would incapacitate them doing a vigorous summer's work in the mines. The situation became desperate and Healey and Hooper decided to brave the terrors of an arctic winter and travel 2100 miles to Port Townsend to order supplies as soon as possible for the starving miners. Healey and his companion, accompanied by two Indians, who were each paid \$20 a day, were provided with strong, substantial snowshoes and light packs. They were dressed in heavy arctic furs. Leavi

Edward Barron's Life.

\*\*ssociated Press Leased-wire Service.\*\*

SAN FRANCISCO, April 10.—Another sensational feature is about to develop in the now famous Barron will case, which has been in the courts of San Jose for several months, and in which the contestant, George Barron, was recently given a verdict, setting aside the last testament of his father, the late millionaire Barron. The will was in favor of the widow.

The now sensation will be the hearing in the suit of Edward Barron (colored,) who claims to be the natural son of the deceased millionaire, against Eva Barron, the widow and administratrix of the Barron extate. The wretched story of Edward Barron's nemesis cropped out in the recent trial. T. J. Suillivan, Barron's agent, testified how he had taken the negro mother of Barron's alleged child, to Louisville, Ky, bought her a house there and given her a sum of money, which, it was supposed, would banish her forever from Barron's presence.

She left the sunny South. She wearled of the plantation and the society of her race. She returned to California and besieged the Barron residence. She camped upon the trail of the weak and nervous old man. She assailed him when he left the house. She defied the special policeman, who was hired to warn her off, and she became the most irritating and persistent uniance in the closing days of the millionaire's life.

When first this dark shadow loomed across his path, Edward Barron made a supreme effort to purchase her absence. The reveated copy of the new third reader is nearly all with the printer, and the remainder will be placed in his hands by the end of the week. Both the books, without any reasonable doubt, will be ready for market by July 1. The grammar is arranged in three distinct departments, to cover relatively the sixth, seventh and eighth years in school. The first section is now entirely completed, the second substantially so, and the third well under way. ## DEADLY WEAPONS.

A Heavy Penalty for Carrying Them at San Francisco. San Francisco, April

numerous tragedies, assaults with intent to kill and hold-ups by footpads have led to an investigation and agitation of the question to make more stringent reguations to prevent the carrying of pistols.

The prison blotters show that during the last fiscal year the San Francisco police made 778 arrests in which the crime involved the use, display or possession of a deadly weapon. Many of these crimes were violent, and in a considerable percentage of them life was taken. This list did not cover the full number of crimes by any means, as a large number of robberies, woundings and even nurders were perpetrated without the detection or arrest of the perpetrators; but it is startling enough as it is. An explanation of this prevalence of violent crime is to be found in the fact that 475, over 60 per cent. of these offenders were discharged without punishment, and only 239 had been convicted at the time the report closed.

It is this showing, together with the disclosures concerning the ease with which permits to carry pistols are obtainable from the Police Commissioners, that has set affoat the agitation now demanding more universal and befitting punishment for the bearing of deadly weapons. Supervisor Dimond will therefore introduce an ordinance fixing the minimum penalty for carrying a pistol without a permit of \$500, with an alternative of six months' imprisonment. the last fiscal year the San Francisc

missing Reedley rancher, was not with Sanders when the latter drove away from the Wootton ranch on the evening of February 1 of last year. M. M. Record and Newton Wiseman, the new witnesses, saw Sanders driving on the road to Reedley, only a mile from the Wootton house, and were positive that there was no one with Sanders.

This testimony, while of little value in the forgery case, is held to strengthen the opinion of detectives and experts that Wootton never left the house alive, and that his body is hidden somewhere around the house. A number of witnesses were called to testify as to the references made by Sanders to Knausch and Graves, the mysterious individuals whom no one but Sanders to Knausch and Graves, the mysterious individuals whom no one but Sanders has seen, and, who, after a whole year's search, still remain undiscoverable by either the prosecution or the defense.

Testimony bearing directly on the forgery charge will be taken tomorrow.

The five terms are now fully confirmed by the later developments of the conference. Three additional ones have now been added, and these, it is believed relate to trade matters. Which one of these eight terms of peace is the cause of delay is not known here.

FEATURES OF THE NEGOTIATIONS.

WASHINGTON, April 10.—The JapanChina armistice closes in ten days, so
it is anticipated by diplomats and officials
that final terms of peace must be near at
hand. It is stated, however, by a diplomat of experience with Chinese and Koreans that it is characteristic with them
not to meet an emergency until the last
day, A case is cited in which Japan gave
Korea three months to acquiesce in certain
conditions. There was no response until
the day before the three months expired,
when the local Koreon officials appeared
and stated that the subject was overlooked, and that more time was desired,
which request, however, was not granted.
It would not be surprising to the officials
if Li Hung Chang took full ten days before yielding to all that the Japanese demanded.

The reports that the indemnity will be
about 400 000 000 wan coincides with the FEATURES OF THE NEGOTIATIONS.

if Li Hung Chang took full ten days before yielding to all that the Japanese demanded.

The reports that the indemnity will be about 400,000,000 yen coincides with the understanding here that 200,000,000 yen would be the amount of payment. The present rate of exchange on the silver yen is 47 cents, so that 400,000,000 silver yen would be \$183,000,000. It is agreed by all hands, including the Chinese and Japanese officials, that the independence of Kores will be one of the terms of peace. This brings out the curious fact that the United States is the only power which has bitherto recognized Korea's independence and has received a diplomatic legation from that country. It is stated that some time ago China addressed a private letter to all foreign powers in which she argued that Korea was independent in conducting all her internal affairs, but was a tributary of China as far as dealing with foreign powers was concerned. It never has been disclosed what answer the powers gave, but from the fact that Korea has no diplomatic legation suitide of the United States, it is concluded the European powers acquiesced in the Chinese auggestion and falled to accord Korea complete independence of China. It is understood that the United States never made any formal reply to China's contention, but the establishment of the Korean legation at Washington was a tacit refusal to recognize China's authority over Korea and a recognition of the latter's independence. It is believed that the peace agreement betwen Japan and China will extend her treaty-relations with the remainder of the world and establishment of the remainder of the world and establishment o dom will extend her treaty relations the remainder of the world and tablish legations throughout Europe well as in the United States.

NEW YORK, April 10.—The two-masted schooner Gracie T. finished fitting out at Bast-river pier last night for a unique roysge in southern waters. She will proc echooner Gracie T. fmished fitting out at
East-river pier last night for a unique
voyage in southern waters. She will proctiosity be a floating cannery. She will
sail today for Port Royal, Jamalca, and
thereafter, until the fail, she may be seen
in West Indian, Floridan and gulf ports.
Until a few weeks ago she was owned by
James Tregardthen & Son. Benjamin
Wood, with several speculative friends,
bought her and had her prepared for the
commercial expedition, which its promoters
hope will yield a big percentage of profits.
The Gracie T. carries six canners and
a chef, besides her skipper, Capt. Wilbur
and a crew of several men. She has aboard
15,000 empty cans, which will, it is expected, be filled with turtle, pompano,
guava jeity and game and fruits of many
kinds before she returns to this port in
the tail. The turtles will be caught in
the tail. The turtles will be caught in
the themp, manufactured stricles, which
form part of the schooner's cargo.

The means will be boiled down in three
copper cauditrons. Then they will be
canned and lowered into the process kettle
in steel crates and subjected to a high
temperature in the boiling, under itsam
pressure, to make them keep.

The chef will superintend the preparation of the means and fish, and will make
guavas into jelly after the most-approved
rocepts. There is a duty on jelly, but
not on guavas, but in manufacturing the
jelly on board the American vessel, the
projectors of the sea-going cannery expect
to eccape the duty and sell the jelly,
cheaper than it is sold now in America.

Much of the canned goods will be brought
back on the schooner. Some will be landed
and sent by railroad to the north from
the southern ports, at which the schooner
will touch.

A couple of weeks ago the Riverside Exchange issued a circular stating that in consequence of the demand in the East for medium and small-sized oranges, and of the increase in the size of their fruit as the season advances, they cannot accept orders for straight cars of the medium sizes. They will go as near meeting the requirements of buyers as possible, but reserve the privilege of assorting cars about as understated, and in the absence of agreement to the contrary will insist upon acceptance of the same, viz:

An important experiment in a new method of transporting wheat from the Pacific Coast to Europe was recently tried and met with entire success. The Minneapolis Journal announces that P. H. Peavey & Co., of that city, had received advices from Panama announcing the entire success of their experimental shipment of wheat from Portland to Liverpool, so far as the transfer across the Isthmus of Panama is concerned. The wheat was shipped from Portland about January 20, and the expectation was that the wheat would be in Liverpool in four weeks; instead about seven weeks was used in making the shipment on account of a failure to make steamer connection for Liverpool at Colon. All wheat going from the Pacific Coast to Europe has hitherto been shipped via Cape Horn, and the paisange is a long one. F. H. Peavey & Co. conceived the idea of making a shipment via the Isthmus, the point being whether the wheat could be transferred in good condition via the Panama Railroad from Panama to Colon. Severalmonths ago the company sent a man to the Isthmus to investigate, but the trial shipment was delayed until January.

The wheat was shipped from Portland in bags, unloaded at Panama and placed in bulk for shipment to Colon, where it was rebagged for shipment to Europe.

favorable; so much so that it is the expectation that the organization of a connecting line of steamers will be effected with the idea of carrying wheat from the Pacific Coast to Europe in thirty days, thus shortening the time of shipment materially and enabling the Pacific Coast to come into closer contact with the European market.

If wheat can be successfully shipped in this manner when it has to be rehandled twice on the road, how much greater will be the development of the business after the Nicaragua Canal shall have been constructed.

GENERAL BUSINESS TOPICS.

nary grades of French wine, but are not prepared to believe that California will ever be able to make any serious competition with the finer brands. It may be that many years will pass before California will succeed in making wines that are fully equal to the finest European brands, but that this will be done eventually there is no reason to doubt. It has taken the French and the Germans a thousand years or more to thoroughly master the details of producing the finer varieties of wine, while in California the wine industry is scarcely a quarter of a century old. Besides skill in manufacturing there are conditions of soil that greatly affect the quality of the wine produced. As a rule the soil of the California vineyards is too new and rich in nourishment—too "fat"—to produce the finest grades of wine. It has been noticed that in some of the older vineyards of Napa and Sonoma counties wherever the phylloxera has not destroyed the vines the product of the grapes is of a more delicate character.

The weather-crop bulletin of Southern California for the week ending Monday, April 8, 1895, reports: Fair weather prevailed, with generally a normal temperature in all the districts, and some drying northerly winds the latter part of the week which rapidly absorbed the surface moisture, and which permited vineyards to be plowed heretofore too wet for this work. Vegetation advanced vigorously under favorable growing conditions; early-sown grain is beginning to head and new barley hay and affairs have appeared in market. Reports continue to indicate a light crop of apricots, while other deciduous fruits promises well, as the buds are setting in good shape.

San Luis Oblego—The warm weather of the past week has been beneficial to fruit and other crops. The potato crop is maturing nicely. Vineyardiest have been busy plowing land that was recently too wet to work. Musick: A strong wind blew several days, drying up feed and grain, chemwise everything looks well.

Los Angeles county—Los Angeles city: Fair weather prevailed during the week, with a normal range of temperature; the highest was 82 deg., lowest 43 deg.; season's rainfail to date, 15.45 inches. Verdugo: The dry winds of the past week dried up the surface of the ground so that a light rain would be acceptable, but grain and grass are growing rapidly. Or ange trees are in full blossom; total rainfail to date, 24.93 inches. Highest temperature, 66 deg.; lowest, 39 deg. Pasadems: Fair warm weather prevailed, very favorable truit and crops. Apricots. Are light, all fruits met or an another prevailed, very favorable truit and crops. Apricots. Are light, all fruits and truit and crops are gooking well. Highest temperature, 75 deg.; lowest, 42 deg. WASHINGTON, April 10.—The April report of the statistician of the Department of Agri-WASHINGTON, April 10.—The April report of the statistician of the Department of Agriculture makes the average condition of winter wheat on the lat of April, 81.4 against 58.7 last year. It was 77.4 in 1832; 81.2 in 1892 and 89.9 for the year 1891. The average for rye is 87.0. The average of wheat for the principal States are: New York, 92. Pennsylvania, 32; Kentucky, 36; Ohio, 86; Michigan, 78; Indiana, 83; Illinois, 87; Missouri, 89; Kansas, 53; Nobraska, 45; California, 94. Generally the past winter has been hard on wheat. The fall of 1894 was a dry one and not favorable in many States either to germination or to the maintenance of the vitality of the plant. The spring has also been droughty over extensive areas. Much good, however, has been derived by the rains in the latter part of March, particularly in the States of Indiana, Illinois, Missouri and Iowa. Moderate rains also fell in Nebraska and South Dakota. It is reported however, that the soil was so dry and had suffered so long from drought that it will require much heavier rains to produce any permanent effect. The average date of seeding for the whole country was October 2. Very little damage from the Hessian fly is reported.

## SAN DIEGO.

Recent observations in and about San Diego convince us that the tide thereabouts, that busines conditions are improving, and that prospects are slowly but surely bemore auspicious.

When a people realize the fact that they cannot thrive on buying and selling town lots alone, any more than two boys in a room can get rich by swaping jack-knives, a valuable been made. San Diego county offers an instruc hopeful and interesting study to observer who has noted the gradsure and substantial upbuilding counties of Southern California ince the days of business feverishand of booms seven or eight ears ago. Probably the world has never known a more acute spasm of estate speculation than that in San Diego during 1887. It was born speculative mania engendered by obviously desirable natural advantages in the way of a splendid harbor and unexcelled climatic conditions. At that time the spectre Specu lation was marching up and down the Pacific Coast, seeking fresh food with to satisfy its ravenous appeite. And San Diego was a tempting lots were soon owned by people shout the United States. the day for liquidation arrived the of the lots awoke to the realition that the basis of value for land ctly proportioned by the revenue such lands will yield. Bower, as the representative of his company, had a clear and indisputable remedy by civil action. To resort to mob violence was a crime against eace and good order for which he deserves the severest punishment that the law can inflict. As regards the equities of the case, that is a matter for the courts to determine. But no occasion can justify violence. The action of Bower was, if possible, more reprehensible than the acts of strikers in destroying property when a strike is in progress; for Bower's act was deliberately planned and was as deliband order and all that constitutes good

The Chicago courts should make an example of this man and of the company which he represents. Debsism is Debsism, and anarchy is anarchy, no natter in what guise they may me querade. The rioters should have been arrested for riot, and should be punished for riot to the utmost limit of the law.

One policeman or a constable, armed with an order from the court, could have stopped the trespass upon the Chicago Railway Company's tracks, if a trespass was committed. The law is for all citizens, and none should be allowed to violate it with impunity. A street railway superintendent—or even the President of the United States—is as much bound to obey the law as is the humblest citizen.

The New York Tribune declares that the trolley lines in Brooklyn have al-ready brought about the loss of 105 lives. Most of these lives might have been saved if proper fenders had been used on the cars. The situation in Brooklyn, in reference to this question, is like that in other cities. The public require prompt service and rapid transit. In endeavoring to meet this demand the railway companies frequently run over and kill or maim human beings. Sometimes the accident is the fault of the motorman, and some times it is the fault of the person killed or maimed. But in ninety-nine cases out of a hundred if a suitable fender were used the results of the accident Every motor car on every street railroad running through crowded streets should be equipped with safety fen ders of the most approved pattern. part of the people to co-operate in the acquirement of another large system which shall give the city the owner-Los Angeles is no exception, and our Councilmen should do their duty in

Young-who appears for a client who has too good sense to affix his ame to the complaint. In some oc cult way, as it further appears, B. Internal reveue officials and others charged with the execution of the law are literally tearing their hair in their efforts unravel the intricacies of the dismasted. iddled, and generally battered-up raft. Further suits are to be brought on other points not passed upon in the cision. The prospects are that when the Supreme Court gets done with the law it won't yield enough revenue to pay Grover's salary.

The New York Commercial Adveriser observes that "Nobody is author zed to propose the name of Gov. Mor on for the Presidency; but if New York's grand old man makes up his nind that he would like to occupy the White House, he can give the other candidates many sleepless nights." All of which is quite true, no doubt. But there is not much probability that Gov. Morton will enter the race, and there is a strong probability that a certain gentleman of the name of McKinley will not only enter the race, but win it.

That is indeed a brilliant suggestion by Mr. Morton, Cleveland's Secretary of Agriculture, that Nicaragua should adopt a free-trade policy in order to defeat Great Britain's plan of collect-ing customs duties to the amount of the indemnity demanded. This, Mr. Morten thinks, would effectively pre-vent Great Britain's collection of the indemnity. Perhaps it would. But where would Nicaragus come in? The new fruit-shipping company or-ganized by P. D. Armour of Chicago, has announced its intention of run-ning between four hundred and five hundred new fruit cars between Callfornia and Chicago. ## LETTERS TO THE TIMES. The "Scarlet Woman."

at fault, while, if the facts were known,
these same supporters of these dens are
the first cause of these women starting in

keep away? Why not pass a law making
it a misdemeaner for a man to be caught in
one of these dens and punishable by fine
of \$50 or fifty days. Seems to me this
would be the most effectual remedy for
the suppression of this crying evil. The
article in this morning's issue by the

LOS ANGELES, April 16, 1895.—(To the Editor of The Times:) For some unexpolained reason, work has been suspended on the First-street cut. It seems very unfortunate that this work of urgent necessity should be delayed at this time. Ninety days more labor would probably suffice to open the street for traffe. The opening of this very important thoroughfare means much to the citizens of Los Angeles.

Hollingsworth and several other witnesses described the assault, and Bryant did not materially contradict their statements. He appeared without an attorney, and threw himself upon the mercy of the durt. It is probable that his sentence will be a severe one, as Bryant's method of cellecting bills by slugging the debtor is not warranted by the law. A Lost Child.

A Lost Child.

Officer Lennon about 7 o'clock last evening picked up a little girl about 3 years old that was lost on Spring street. He brought her to the station and handed her over to Deek Sergeant McClure, and the little tot soon fell asleep in his arms. She was put to bed in the Receiving Hospital. Up to 2 o'clock no one had yet called for her. The child was plainly dressed and looked as if she had strayed away from home.

## ALL A MISTAKE.

MRS. STEBBINS THOUGHT IT

plain a Shady-looking Bank. Transaction—The Guileless Woman in Jail.

Mrs. Sadie Hubbard, alies Sarah E Mrs. Sadie Hubbard, alias saran as Stebbins, the woman so long sought after by the detectives in connection with the German-American Savings Bank swindle, will have a hearing in the police court today. Size walked in to the chief de-tective's office and surrendered herself, saycleared up.

Zue G. Peck her attorney, stated yeste

day that the woman's true name was Sarah Stebbins, and that she had been in

Sarah Stebbins, and that she had been in the habit of using the initial E, which so-counted for her receiving a letter and draft not intended for her, and which had been the cause of all her trouble.

According to her story, as related by Mr. Peck, she came west about two years ago for her health, first stopping at Denver, then going to Portland, Or., from there to San Francisco, and finally to Southern California. Her hugband, who is living, is a speculator, and has from time to time been sending her money.

In February she inquired for her mail at the postoffice as usual, and was handed a letter addressed to Mrs. Sarah E. Stobbins. It contained a draft for \$200, and a brief note simply stating: "I understand you are having a pleasant time in Southern

you are having a pleasant time in South California. I hope your health will c tinue to improve. I inclose draft for \$ (Signed) "YOUR HUSBAND.

(Signed) "YOUR HUSBAND."

Not having the slightest doubt but that it was from her own husband, she hunted up W. F. Thomas, with whom she had had business dealings, and to whom she was known as Mrs. Sarah E. Stebbips, and had

known as Mrs. Sarsh B. Stebbips, and had-him accompany her to the bank to identify her and have the draft cashed. The rest has already been told.

At Mr. Thomas's suggestion she accom-panied him to San Francisco to open an employment agency, but their scheme fell through. In the meantime she heard from her husband, and then discovered for the first time that he had not sont the draft, and that it was intended for another Mrs. Stebbins.

Mr. Peck says her busband has been telegraphed to, and he will either come her graphed to, and he will enter come in in person or send enough money to pay back the money the bank lost through her innocent mistake, and get her out of her

innocent mistake, and get her out of her trouble.

It is alleged that she has property in Kentucky, the State of Washington and other places, and is simply here for her health. She claims to be on good terms with her husband, who lives in Chicago, but it is not denied that she went by the name of Mrs. Hubbard during most of her stay here. Her fittle girl, who is cared for by a lady friend, is also mamed Hubbard. No satisfactory explanation of this changing of names has been made as yet. Then there are the letters in the hands of the detectives that make her case look bad.

The officers intimate that the woman will make a full confession of her guilt, and that it will make it very unpleasant for several other parties. As yet a great deal of mystery surrounds the case.

A Religious Census.

The movement looking to a religious cen sue of Los Angeles, is certainly a movemen The movement looking to a religious centre of Los Angeles, is certainly a movement in the right direction, and cannot fail to meet with the approval of the Christian element of the city. The churches are taking up the matter in earnest, and the subject will be discussed at a meeting of the Sabbath-school Union, to be held this (Thursday) evening, at immanuel Church, at which all workers interpsted in the matter are urged to be present. Concerted action is the meed in every work for the advancement of the public good, and this is a fact which the churches are at length awaking to and we see in the proposed movement much to strengthen the religious forces in our midst, and to make them far more effective in their battle with indifference and error. It would be well for all those interested in this work to preserve for reference the paper published elsewhere in these edumns—the paper outling the method of work.

Good Time.

The opening meeting of the fourth annual State conference of the Epworth League of California was held last evening, with an audience that filled the Methodist Episcopal Church, South, on Broadway, between Fifth and Sixth streets. The platform was profusely decorated with masses of callas and roses, and the organ-rail was outlined with lilies, with great bunches of wistaria at either and praise service, led by Rev. T. J. Duncan of Los Angeles. Bishop Fitzgerald made a short prayer which was followed by a scripture reading by Rev. Mr. Duncan. After a hymn, ten minutes were devoted to testimonials from members of the league, which were full of gratitude and praise for the organization and its work.

These were interspersed with hymns, and at the close of this portion of the programme, Dr. Hendricks of this city read an address of welcome in which he seld that Epworth was the home of the Wesleys and the birthphace of John Wesley, a bright, courageous Christian man, upon whose dootrine, the church is rooted

read an address of welcome in which he said that Epworth was the home of the Wesleys and the birthplace of John Wesley, a bright, courageous Christian man, upon whose doctrine, the church is rooted and grounded. The object of the league is to incufecte the blessed truths in the hearts of the young people, and to acquaint them with the fundamental doctrines of the church. Its great object is the salvation of souls, and in this work the league is leading the church. The speaker referred to the last conference at Fresno, and then in kindly words, welcomed the league to Los Angeles.

The response was given heartily by W. H. Waste of Oakland, the State president. He thanked the compregation for the corganization, its wonderful growth and work, and said it will bring the young people into the evangelization of the world. The different organizations, the Baptist Union, the Christian Endeavor and the Epworth League were referred to enthusiastically.

After a violin and piano duet, the congregation cang the doxology, and Bishop Pittagerald promounced the benediction.

The remainder of the evening was spent in social greetings. There are already seventy-two delegates enrolled, and move are expected to arrive today. From Downey the delegates comprise: The Misses Orlanda Morse, De Nuce, Graham; Mesers. Ed Rimball, Butler and Adams.

From W. A. Spaulding and others, stating that they are the owners of valuable pieces of property in the district bounded by Edgeware road, Ionis street, Figureta street and Temple street. The presence of oil wells in their immediate locality would effect a serious damage to their property, as it would prevent them from charming insurance, and increase the danger from fire.

The application of M. D. Johnson for permission to bore for oil at Third and Figueroa streets, on which application action had been deferred from last week, was next taken up. This location, it will be understood, is outside the territory which the board a few weeks ago set aside for oil sevelopment purposes.

Aftert McParland, whose residence is within the territory affected by the smoke and disagreeable odors coming from the will be compared a sumber of thousands of dollars in improving his place. He had paid for the grading of the streets on two sides of his property, and besides that had, at no small set, built retaining wells about his property, and besides that the oil development is a great industry. The authorities bould, however, not lose sight of the fact hat the people who have been to the excess of establishing handsome residences are entitled to some protection in the reamses. No property-owner should be ande to suffer because he has been to the spense of making improvements.

He said he lived within about one-half the from the nearest oil well, and yet it is a common thing for him to be awakened the night by the intolerable odor from toe piaces. How would one of the memors of the board feel if he had a home on gueros street or Adams street, which he distantified at great expense, and some root approperty-owner were to rent lot adjoining the member's home and could be member's home?

M. D. Johnson stated that he had paid several thousands of doliars for liferoving his place. The oil wells were being operated near it, however, and he thought it but fair he should have the privilege of boring for oil on his property size.

Insurance War. CITY OFFICIALS TAKE ADVANTAGE OF CUT RATES

Action taken by the city authorities Action taken by the city authorities yesterday in connection with the rate war among insurance men, it is stated, will result in a saving of more than \$1000 to the city. Not only will the sum named be turned into the city treasury, but the insurance policies now outstanding against most of the public-school buildings and against the City Hall will be replaced by policies running for longer periods.

It will be remembered that a few weeks ago the Board of Education adopted a

resolution against paying more insurance premiums on school buildings.

A few days ago, however, an offer to exchange the policies outstanding for policies written for longer periods was received and as a result of such offer Mr. Gariand at the meeting of the school board last Monday evening presented a resolution on the matter, which was adopted. The resolution provided that in view of the existing conditions the Insurance Committee should have power to adjust the matter of reinsurance. It was subsequently learned that offers even better than the one received could be obtained and accordingly arrangements were made to receive bids yesterday noon. At that hour about twenty proposals had been handed in and they were opened in the presence of the members of the committee and a number of other

possis had been handed in and they were opened in the presence of the members of the committee and a number of other city officials.

The bids were for the insuring of the school buildings for a term of three years. They were submitted without reference to the policies outstanding, which policies are worded so that they may be cancelled and a certain rebate obtained for the cancellation. The bids each offered to write policies on the school buildings to the amount of \$352,000 at certain discounts on the union rates.

The five lowest bids were as follows: Hawley, Brandish & Co., representing the Lancashire Insurance Company, \$5½ per cent. discount; W. A. Bonyngs, representing the Insurance Company of North America, the Hanover and the Germania insurance companies, \$5 per cent. discount; Mead, Cohrs & Schnabel, representing the Royal Insurance Company of Liverpool, \$1½ per cent. discount; Victor Wanbowski & Co. and Hinton & Whitaker, representing the Home Insurance Company of New York and the Phoentx Insurance Company of Hartford, respectively, 80% per cent. discount.

It is stated that after the reinsuring is paid for there will still remain from the proceeds of the cancellation about \$600, to

be turned into the city treasury.

The bids having been submitted on such favorable terms for insuring school buildings, members of the City Council later in the day arranged to receive proposals for the reinsurance of the City Hall.

Proposals for the writing of policies for

posals for the reinsurance of the City Hail.

Proposals for the writing of policies for three years on the City Hail to the amount of \$54,000 were received of insurance men. The two lowest bids were: Hunton & Whitaker, 90 per cent. discount from union rates, and William Mead Livespool Insurance Company) 92 per cent discount. It is stated that under the union rates the premium on the City Hail insurance for three years would cost \$1034. The lower of the above bids offers to write the came policy for \$82.72. As in the cancellation of policies outstanding will more than pay for the new policy.

The new policies are to contain provisions that they cannot be cancelled. This will secure the city against the agents taking the risks, afterward attempting to cancel the policies. The outstanding policies, it will be understood, are so worded that they may be canceled, either by the unsured on account of the cancellations.

ANOTHER IRRIGATION DISTRICT

ANOTHEE IRRIGATION DISTRICT SQUABBLE.

The trial of the case of Peter Jones et al. vs. Nathan Cole, Jr., et al., an action to vacate a decree, and restrain defendants from collecting an alleged illegal assessment, or selling plaintiffs property for non-payment thereof, was commenced before Judge Van Dyke in Department Four yesterday, and will be taken up again today.

The plaintiffs, who are stockholders of the Palmdale Irrigation District, allege that on August 5, 1839, Nathan Cole, Jr., commenced suit against the Palmdale Irrigation District to recover, under a pre-tended claim of ownership, the waters of the Little Rock Creek, owned and used by said irrigation district. On January 9 last the Superior Court of this county rendered an opinion in said case in favor of the Palmdale Irrigation District.

Meanwhile, plaintiffs claim that in anticipation of this opinion. Cole fraudulently contrived to obtain possession of certificates for 135 shares of the capital stock of said district. This, being a majority of the stock, gave him the key to the situation, and plaintiffs claim that on November 13, 1894, he voted these shares and by their means secured the election of himself, his cousin, Burt Cole, S. T. Berkley and C. W. Dodenhoff, the other defendants, as directors of said district. Subsequently, he and his colleagues passed a resolution to the effect that, being anxious to settle the matter and avoid further litigation, said district. Subsequently, he and his colleagues passed a resolution to the offect that, being anxious to settle the matter and avoid further litigation aid district agreed to certain terms dictated by Cole. It is alleged that Cole thereupon imposed upon the court and procured a decree in direct antagonism to the opinion already rendered in the case, and, contrary to equity and good conscience, and in fraud of the plaintiffs, wrongfully deprived them of one-half of the waters of said creek.

Plaintiffs claim that neither Burt Cole nor S. T. Berkley is a stockholder, and that therefore the and

Plaintiffs claim that neither Burt Cole nor S. T. Berkley is a stockholder, and that therefore they are not qualified to act as directors of the district. Furtheract as directors of the district. Furthermore, it is urged that of the 4013 shares voted at said election, only 1516 were rightfully represented. These informalities, it is claimed, invalidate the action of said board of directors in levying an assessment of 31 per share, and as defendants threaten to sell plaintiffs' stock unless said assessment is paid, they ask for a restraining order.

The defendants reperally and specifications of the said said assessment is paid, they ask for a restraining order.

The defendants generally and specifically deny the allegations of the plaintiffs, and claim that the \$1 assessment complained of is absolutely necessary in order to meet the operating expenses of the district, as only 20 per cent. of the stockholders are consumers, and the rates fixed are too low to cover the expenses.

MENCED.

In the United States Circuit Court yesterday Judge Ross and a jury were occupied all day with the trial of the care of Mrs. Ella Alten et al. vs. the Southern California Railway Company, an action to recover \$50,000 damages.

The plaintif, who is a resident of Missourt, alleges in her complaint that she is the widow of Russell T. Allen, deceased, and the mother of the minor pisintiffs, Edith May Allen and Earl Truman Allen, aged respectively 4 and 2 years.

On January 15, 1832, her husband, Russell T. Allen, was employed by the defendant corporation as a switchman in its yard at San Bernardino. While engaged in his regular duties as such switchman, on said date, Allen boarded a moving boxear and attempted to set the brake. While en route from the East, however, the brake had been broken by the projecting timbers on a fact car ahead of ft, and the result was that when Allen handled it without noticing that it was out of gear, it gave way. He was thrown from the top of the car to the track in front of the wheels, which passed over his body and killed him.

The defense claims, of course, that Allen's death was due to contributory nearly

him.

The defense claims, of course, that Allen's death was due to contributory negligence on his part, in that he failed to notice that the brake was broken before attempting to use it. The trial of the case was not concluded, and will be taken up again this morning.

deputies of the county prosecutor's office were much amused by the service upon Maj. Donnell of a singular complaint. The document was quite long and contained in substance the charge that one J. R. McIntyre had been refused a complaint by the District Attorney, and that therefore that official should be compelled to give up his position, all because he had exercised his discretion and refused to inaugurate a prosecution which would entail needless expense and result undoubtedly in dismissal. The complaint was sworn to by one J. E. Young, and G. A. Williams subscribed the document as attorney for complainant.

There is a story in the case, and from all that can be learned, B. Duncan, he of the libel-sult fame and "evil eye" is the man who furnishes the inspiration. It was one morning last week that a young man came hurriedly into the District Attorney's office and stated that he had a case which he would like to present in order to get the opinion as to whether or not he was entitled to a complaint. He said that he had come down irom Santa Barbara with a few hundred dollars and had purchased a half-interest in a bowing alley of J. R. McIntyre. The conditions of the sale, he stated, were that a saloon license should also he secured in order that a bar might be run in connection with the places and to increase the profits. Later on he gave a check for the purchase price of the remaining interest, and told McIntyre that the money would be in the bank on the following day to satisfy the same. However, he claimed that the salon license had never been secured and that hence he had been induced to purchase by means of false prefenses. After a thorough and careful investigation of the case the District Attorney's office and that hence he had been induced to purchase by means of false prefenses. SANTA FE REORGANIZATION. NEW YORK, April 16.—The board of di-rectors of the Atchison, Topeka and Santa Fe Company met adday and issued the fol-lowing circular letter to the stockholders

Fe Company met soday and issued the following circular letter to the stockholders of the company:

"When your directors were elected they found your company bankrupt, its property in the hands of receivers, its defaulted interest amounting to many millions of dollars, its floating debt more than \$10,000.000, its recairs, renewals and improvements not up to date, its business badly demoralized. In addition to this the reorganization committee had long been considering the problem of reorganization, and had already announced and withdrawn one plan. By the time your directors had acquired a full knowledge of the conditions and requirements of your company the original reorganization committees, desiring perfect unity of action, had arranged for a committee known as the Joint Executive Reorganization Committee, and this committee had sken up the task of making a plan where the first committee had left it off. A plan has finally been formulated and announced. During the time through which the Joint Executive Reorganization Committee has devoted itself to forming this plan your directors have given unceasing attention to it, and have left nothing undone to secure on the part of the committee a knowledge and consideration of all plausible and pertinent facts and opinions relating to a proper recognition of the shareholders.

"In every feasible way the views of your directors and individual abavaholders."

relating to a pretenent facts and opinions relating to a proper recognition of the shareholders.

"In every feasible way the views of your directors and individual shareholders and their friends have been brought to the attention of the committee. What has been communicated to it has also been communicated to it has also been communicated so far as was proper to many independent parties of great financial strength, whose interest in the property has been repeatedly and earnestly appealed to or solicited. No new interest seemed willing to undertake so great a task as the one presented. The Joint Executive Reorganization Committee, therefore, has been alone in the field so far as relates to the actual promulgation of a plan. The reduction of the assessment from \$12 per share in the stock, the amount fixed by the first committee, to \$10, giving the preferred stock for this assessment, and the reduction of the fixed charges so as to insure to the stock what seems to be absolute immunity from the danger of foreclosure in the future, are provisions in line with our efforts for fair treatment to shareholders. Though the charge ahead of the present stock is somewhat increased, the property and its possibilities are bettered, and the net result is undoubtedly a great gain over existing conditions.

"On completion of the plan it was underwitten by Measure and the meters and the property witten by Measure and the service of the property witten by Measure Desired and the meters and the property and the pro

and its possibilities are bettered, and the net result is undoubtedly a great gain over existing conditions.

"On completion of the plan it was underwritten by Messrs. Baring Bros. & Co., of London, and other strong foreign and American bankers, who should be able to estimate correctly the probable future of the shares. These underwriters have assumed the liability of paying the assessment and taking the stock. It is evident they would not have done this but for the hellef that the stock would have its present value or a higher one. The outlook is, therefore, that the general mortgage bond-holders will deposit their bonds, the plan be effective and an entire reorganization of the system be speedily accomplished.

"In view of these considerations we approve the plan, recommending that the stock be deposited and the assessment paid, and the reorganization be facilitated in every possible way."

The report was signed by William L. Bulle, James A. Blair, Edwin Berwind, B. P. Cheney, Jr., H. R. Duval, Thomas P. Fowler, Charles R. Gleed, Samuel P. Lawrence, John A. McCall, George A. Nickerson, John A. McCall, George A. Nickerson, J. H. Cheney, Excellent R. Sturgis.

HOMESEEKERS' EXCURSIONS

HOMESBEKERS' EXCURSIONS.

CHICAGO, April 10.-All of the Western lines will on April 23 run home-scekers' excursions from all points in their territory east of the Missouri River to points in the West and Southwest. This action was taken because of the homeseekers' excursions recently announced by the Texas lines and others in Southern territory. The excursions will be run at one fare, plus \$2 for the round trip, and the return portion of the ticket will be good twenty days after the date of sale. After the lines had disposed of the excursion business the matter of reduced rates made by the Rock Island, Burlington and Union Pacific roads, because of the excursion to Eastern Colorado points run by the Atchison road, came up for informal discussion. The notices of reduced rates made by the Rock Island, Burlington and Union Pacific were read and confirmed, but the Atchison stated that it was not disposed to take any action until it was assured of the relations of the Rock Island to the association agreement, as that line had given notice that it was determined their territory east of the Mis the association agreement, as that line had given notice that it was determined to protect its interests if the association agreement was not sufficiently strong to protect its members. APPROVED THE PLAN

THE INSURANCE WAR.

THE LOCAL AGENTS TRYING TO STOP THE CARNAGE.

Some Outside Companies Will Con-tinue to Out Bates in Spite of an Agreement Made Last Evening.

At a meeting of the local Board of Fire Underwriters last evening, it was agreed that members should cease rate-cutting for the present. This resolution is not likely to improve the situation, however, as two companies outside the union are slashing rates right and left, and members of the board are compelled to meet the cuts in self-protection panies referred to are taking risks for almost nothing, and the board is en-deavoring to force them into the com-pact, and thus put an end to such ruin-

pact, and thus put an end to such ruinous competition.

Another meeting of the board will be called shortly to carry the war into Africa, if necessary. Most of the agents say if the war becomes general it will be disastrous to both insured and insurers. Agents' commissions, they say, will dwindle to nothing, and the revenues of the companies will be so decreased that many of the smaller ones will be forced cut of business. The transfer of the risks they carry to other companies, they ray, will be an inconvenience to the assured; and many policies may become worthless altogether.

Alameda's Favorite Son Speaks in , Words as Penetrating as Molten Fire.

This Brilliant Californian Picturesquely Presents the Qualities and Peculiarities of the Great Home Remedy, Joy's Vegetable Sarsaparilla.

Men of rare attainments, of peculiarly specific ability, endowed with strong physical or mental qualities, gifted by nature, are forced to the front by the natural oppor-tunities of California. In patriotism, in finance, in art, in literature, in science, in commerce, in philanthropic and educational fields, Californians are walking with the fore-most men and women in the Union. Is it not so? A conspicuous figure in journalism is Mr. Gilbert A. Dodge. Old newspaper men and young newspaper men have received information and encouragement from this gentleman. A plain man, fond of plain dealing, honestly believes in his State and her productions, speaks his convictions forcibly.

Like many others I have a strong aversion to anything in the form of pills. As a consequence for twenty years past I have been a liberal patron of the various proprietary medicines known as sarsaparillas, syrups, etc. Now I buy only Joy's Vegetable Sarsaparilla, believing it to be the best of its kind now on the market. The death rate in this country would be materially lessened if this preparation was kept in every home and judiciously used. The old common-sense law of health—"Trust in Providence and keep the bowels open," hits the nail square on the head, and I religiously believe that there is no other laxative and regulator manufactured quite as pleasant to the taste, so broadly beneficent and so eminently satisfactory in its results as Joy's Vegetable Sarsaparilla.

PASADENA, April 10.—(Special Corre-pondence.) Apropos of an ordinance sgulating the speed of bicycles upon the ubilc streets, Mayor Cox today said that bild streets, Mayor Col had no doubt that bicycles. came un-the ordinance numbered 246, and en-ed "an ordinance regulating the riding I driving of animals and vehicles upon thways." That ordinance makes it unvehicle at an immoderate rate of in or along any street or avenue asadena. It is the sense of many ns consulted upon this matter, that:
miles, the regulation speed which
York and other cities has established
teycles, is reasonable for the crowded
on of the town, and wheelmen who New York and other cities has established for bicycles, is reasonable for the crowded portion of the town, and wheelmen who have been spoken to are even more anxious that some such regulation should obtain, than are other citizens, for they yiew with disfavor the reckless riding of gyclists, and recognize the danger of Bringing wheeling into disrepute, owing to their carelessness. It is certain that the Supreme Court has decided that a bicycle is a vehicle, and if it is not, it would be interesting to know just what it is considerd by the laity. While there has been some talk of petitioning the Council to make regulations for the speed of bicycles, such a petition is not absorbitely necessary, for the Council can frame an ordinance without any such procedure, and as the City Council of Pasadena is not given to any lack of proper care of public rights, it is not unlikely that they may consider it wise to "call down" the reckless class of cycle riders. There are no regulations in force regarding lamps on the cycles at night, and few of the wheelmen use whistles or bells as warnings to pedestrians. It is said by some cyclists that the Crown-City Club should do its utmost to bring about a uniformity in the use of signals by its members, and should take the initiative in having proper regulations established for riders in the business section of Pasadena. The paragraph in The Times recently upon the bicycle "speeder" has been the subject of much comment, and expressions of opinion have been numerous, with almost a uniformity that it is not always the best policy for citizen

MISSTNG MICROBES.

The next inmate of the City Jail will be treated to a lodging in a structure for the nonce devoid of all microbes, for it had such a fumigation today as it will not be likely to get again in a long while. Willis C. Valen of Indianapolis gave an exhibition in the jail to the chief of the city fire department, the city officials and other interested parties, of a patent helmet smoke protector, which is likely to revolutionize fire-fighting, and be of vast service to firemen generally. The helmet is made of fire-proof asbestos-tanned leather, has a reservoir at the back filled with compressed aft, which is led by tubes to a point directly before the mouth and mostrils of the wearer. The sight is protected by plates of mica, and the hearing rendered perfect by means of an artificial trympanium arrangement. The test was a sulphur fume so strong that it could scarcely be entered by one without protection for the eyes and nostrils, and Ed Fauke and Frank Whittaker of the city fire department, wearing the helmet, remained in the smoke from thirty-eight to fifty minutes without being able to detect the fumes of sulphur. A test on a large scale will be given in Los Angeles during the fiests.

The regular meeting of the Tuesday Evening Club was not very largely attended Tuesday night, as there was some misunderstanding about the rendition of the programme. Those who were present enjoyed a social time, and Mr. Whipple rave an exhibition of "mind reading." Ocean Front Park—Personal and Local News Notes.

SANTIA MONICA, April 10.—(Special Correspondence.) Under immediate supervision of the Street Superintendent, who, by the way, is an experienced nurseryman, Ocean Front Park has been very materially improved, and will be more than usually attractive during the approaching summer season. The paims set a year ago along Ocean avenue have grown very healthily since they were put out, with the exception of about a score, which fell victims to the ravages of goophers. These have been replaced, and a large number of paims and other ornamental trees added to the lower end of the plat. The portion at the foot of Railroad and Utah avenues has been carefully cleaned and overhauled, and water pipes laid that will pernit the patches of lawn to retain their winter green during the dry months. The Street Committee has also plans about to be carded out for the planting of a large number of other ornamental trees and shrubs. Plece by piece the park is being brought under such cultivation as to give hint of the beauty it will some day contribute to our water-front, and the entire public is interested in having good and permanent work done upon it. Meantime, the trees have been considerably thinned out in Seventh-street Park. The growth there, left largely to nature unassisted, has been remarkable, so that the small trees of a few years ago had become too thick and shady for their intended purpose. This defect has been remedied, and the job was self-supporting, the town realizing well toward \$100 for the wond obtained in excess of the cost of setting it out and clearing up the park.

## MURDERED SHEEPHERDER.

A. BRUTAL TRAGEDY ENACTED

One Basque is Dead and His Slayer is a Fugitive with Officers on His Track—He Has a Fair Start.

Fair Start.

Word reached the Coroner and the Sheriff simultaneously about 10 o'clock yesterday morning that a murder had been committed at "Nigger Slough" on the old Dominguez ranch. Coroner Campbell and Deputy Sheriff Martin Aguirre left as soon as possible for the scene of the tragedy. Upon arrival there they found that the crime was committed the preyious evening between 5:30 and 6 o'clock. The delay in notifying the officials afforded the murderer ample time to make his escape, so only the Coroner's mission was successful, while the Sheriff's representative returned to the city empty-handed.

The murderer man was Juan Gugenburo, and his slayer is Martine Toledo, both Italian or Basque sheepherders in the employ of George Carson, the proprietor of the Domingues ranch.

The murder, which was a most brutal one seems to have been the result of a dispute about wages, or jealousy on the part of one man on account of the position of the other.

Toledo had for some years been foreman of Mr. Carson's sheep camp. Some time ago he became III, and during the period on his pickness, Gugenburg acted the was reliated in his old position, but from that time forward bad feeling existed between the two men. About two weeks ago Toledo drew all the money coming to him and transferred \$55 to Gugenburo's account for the work performed by the latter during the time Toledo was sick.

Tuesday evening the men met at the sheep camp and some dispute arose about the payment of the \$55 and they were soon in heated quarrel. The only witness to the crime was a Basque, who says Gugenburo finally ran from the room pursued by Toledo, who seized a piece of wood and when he overtook the other man beat him over the head until he was dead.

The victim's frontal bene was broken in and he had bruises across the chest. His knuckles were broken, which showed that he had bruises across the chest. His knuckles were broken, which showed that he had he was called a horse and saddle, mounted and rods away, and he was completed and rods away, and he was

which accounts for Toledo's sample time to escape.

Coroner Campbell and Deputy Sheriff Aguirre drove from the railway station near Mr. Carson's house to the place where the crime was committed, a distance of about five miles, and procured the body, which presented a ghastly appearance. They took the corpse between them on the seat of the buggy and brought it to Domingues Station to be shipped to the city by train. It arrived yesterday evening and the Coroner will hold an inquest at 10 o'clock this morning at Kregelo & Bresee's undertaking rooms.

Deputy Sheriff Aguirre returned to the city about 4:30 p.m. and about 5 p.m. started out again in search of the murderer who he thought he had located and expected to capture in a few hours.

Sheriff Burr was seen about 10 o'clock last night and, stated, that no clew to the murderer's whereabouts had yet been obtained, and he feared he was on his way to Mexico. Telegrams have been sent in every direction giving a description of the man, and every effort will be made to head him off, but his apprehension now appears doubtful.
